NIBAV STANDS TALL WITH 2000+ EMPLOYEES IN OVER 55+
EXPERIENCE CENTERS' AND OFFICES, SPREAD ACROSS THE GLOBE.

nibav Lifts

Introduced to the industry in 2002, NIBAV is a pioneer in manufacturing patented home lifts by incorporating unparalleled engineering excellence and state of the art pneumatic elevation systems.

Our Commitment

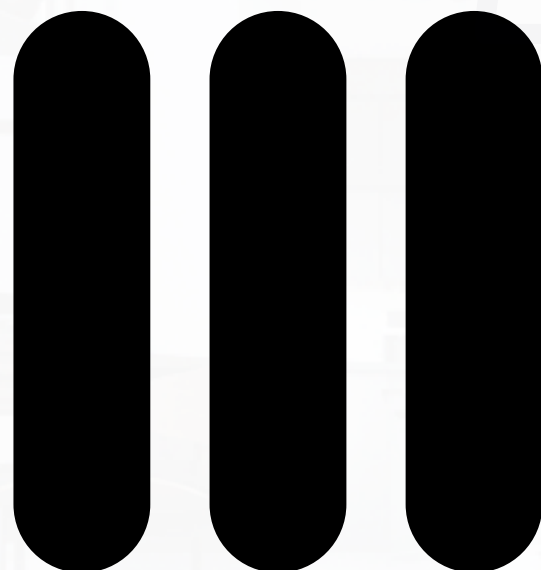

Engineered to use AIR, these elevators are easy to install and have a panoramic design, perfect for both retrofit and new construction projects. Manufactured in accordance with European Standards, we at NIBAV are committed to delivering par excellence.

Our Promise

Safety is extremely important at home because it is the place where we spend most of our time and where we should feel the most secure. Our commitment and promise is to make your house a safe and comfortable home.

Capacity	: 240 kg / 529 lbs
Clear Space Required	: 1430 mm / 56 in
Internal Cabin Diameter	: 1160 mm / 46 in
External Cylinder Diameter	: 1343 mm / 53 in

Wheelchair Compatible

Advanced Suspension System

Designed with a unique suspension, NIBAV's Series III guarantees an exceptionally seamless landing at every floor stop. Such a suspension mechanism expertly regulates the elevator's descent to align with the stopping level, delivering an unrivaled, razor-smooth landing experience. This revolutionary characteristic not only elevates the overall ride quality for passengers but also diminishes the strain exerted on the elevator's components, thus potentially enhancing their longevity. Incorporating this advanced technology into elevators is a remarkable step towards enabling vertical transportation that is both more efficient as well as luxurious.

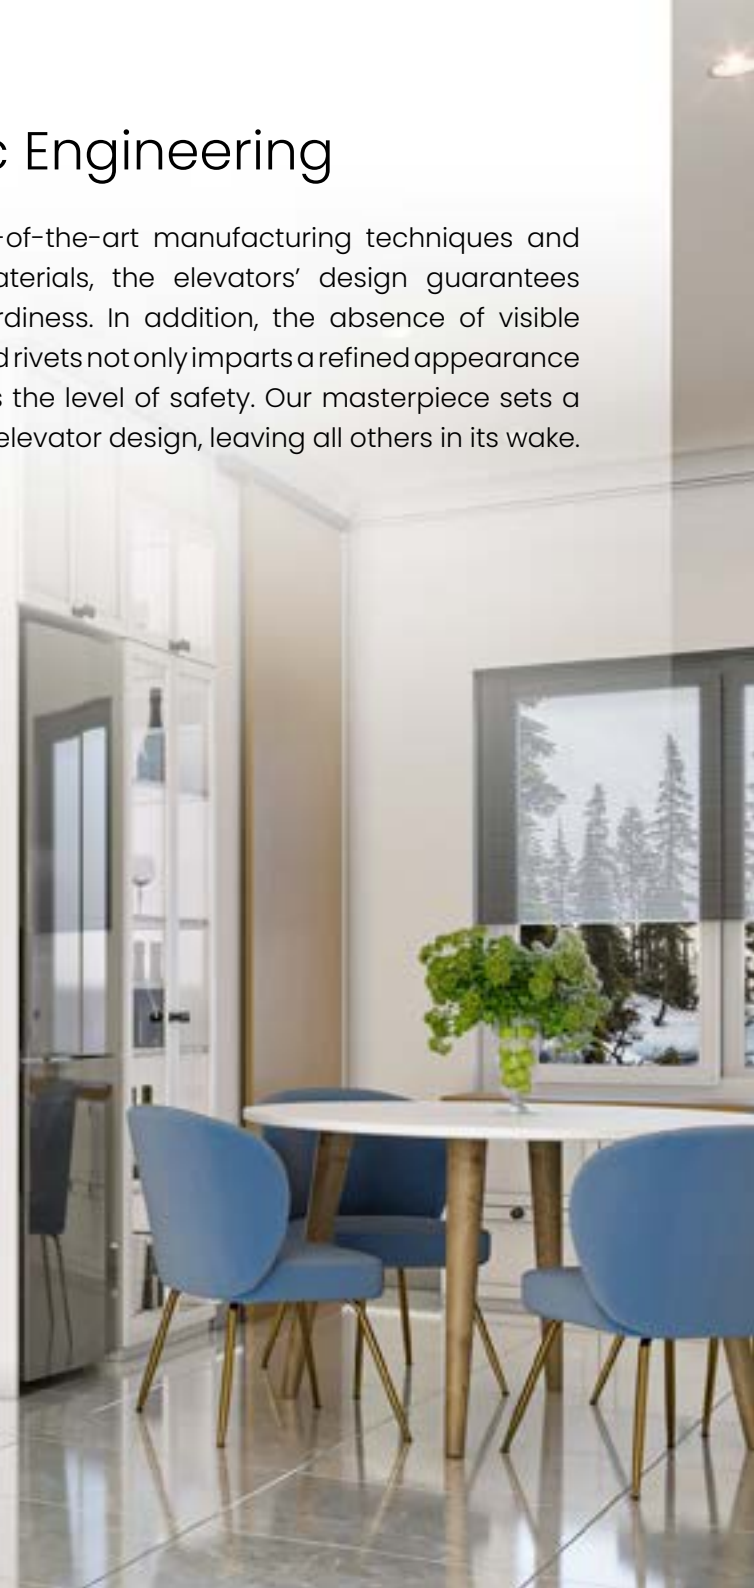

nibav

Futuristic Engineering

Employing state-of-the-art manufacturing techniques and revolutionary materials, the elevators' design guarantees unparalleled sturdiness. In addition, the absence of visible screws, welds, and rivets not only imparts a refined appearance but also elevates the level of safety. Our masterpiece sets a new standard in elevator design, leaving all others in its wake.

Modular Enhancements

NIBAV lifts come in a completely knocked down manner directly from the manufacturing unit. Also, these lifts are compatible with all other modifications that may be needed in the course of its lifetime. You can add or remove additional stops and also make customized improvements for the interiors.

Self Supported Structure

NIBAV Lifts are stand alone installations that do not require any supporting beam, column or wall. The external shaft is made of polycarbonate glass that is 250 times stronger than normal glass.

360° Panoramic View

Our elevators are designed with utmost consideration for comfort and safety. Featuring panoramic views, these elevators aim to alleviate claustrophobic feelings by offering expansive vistas.

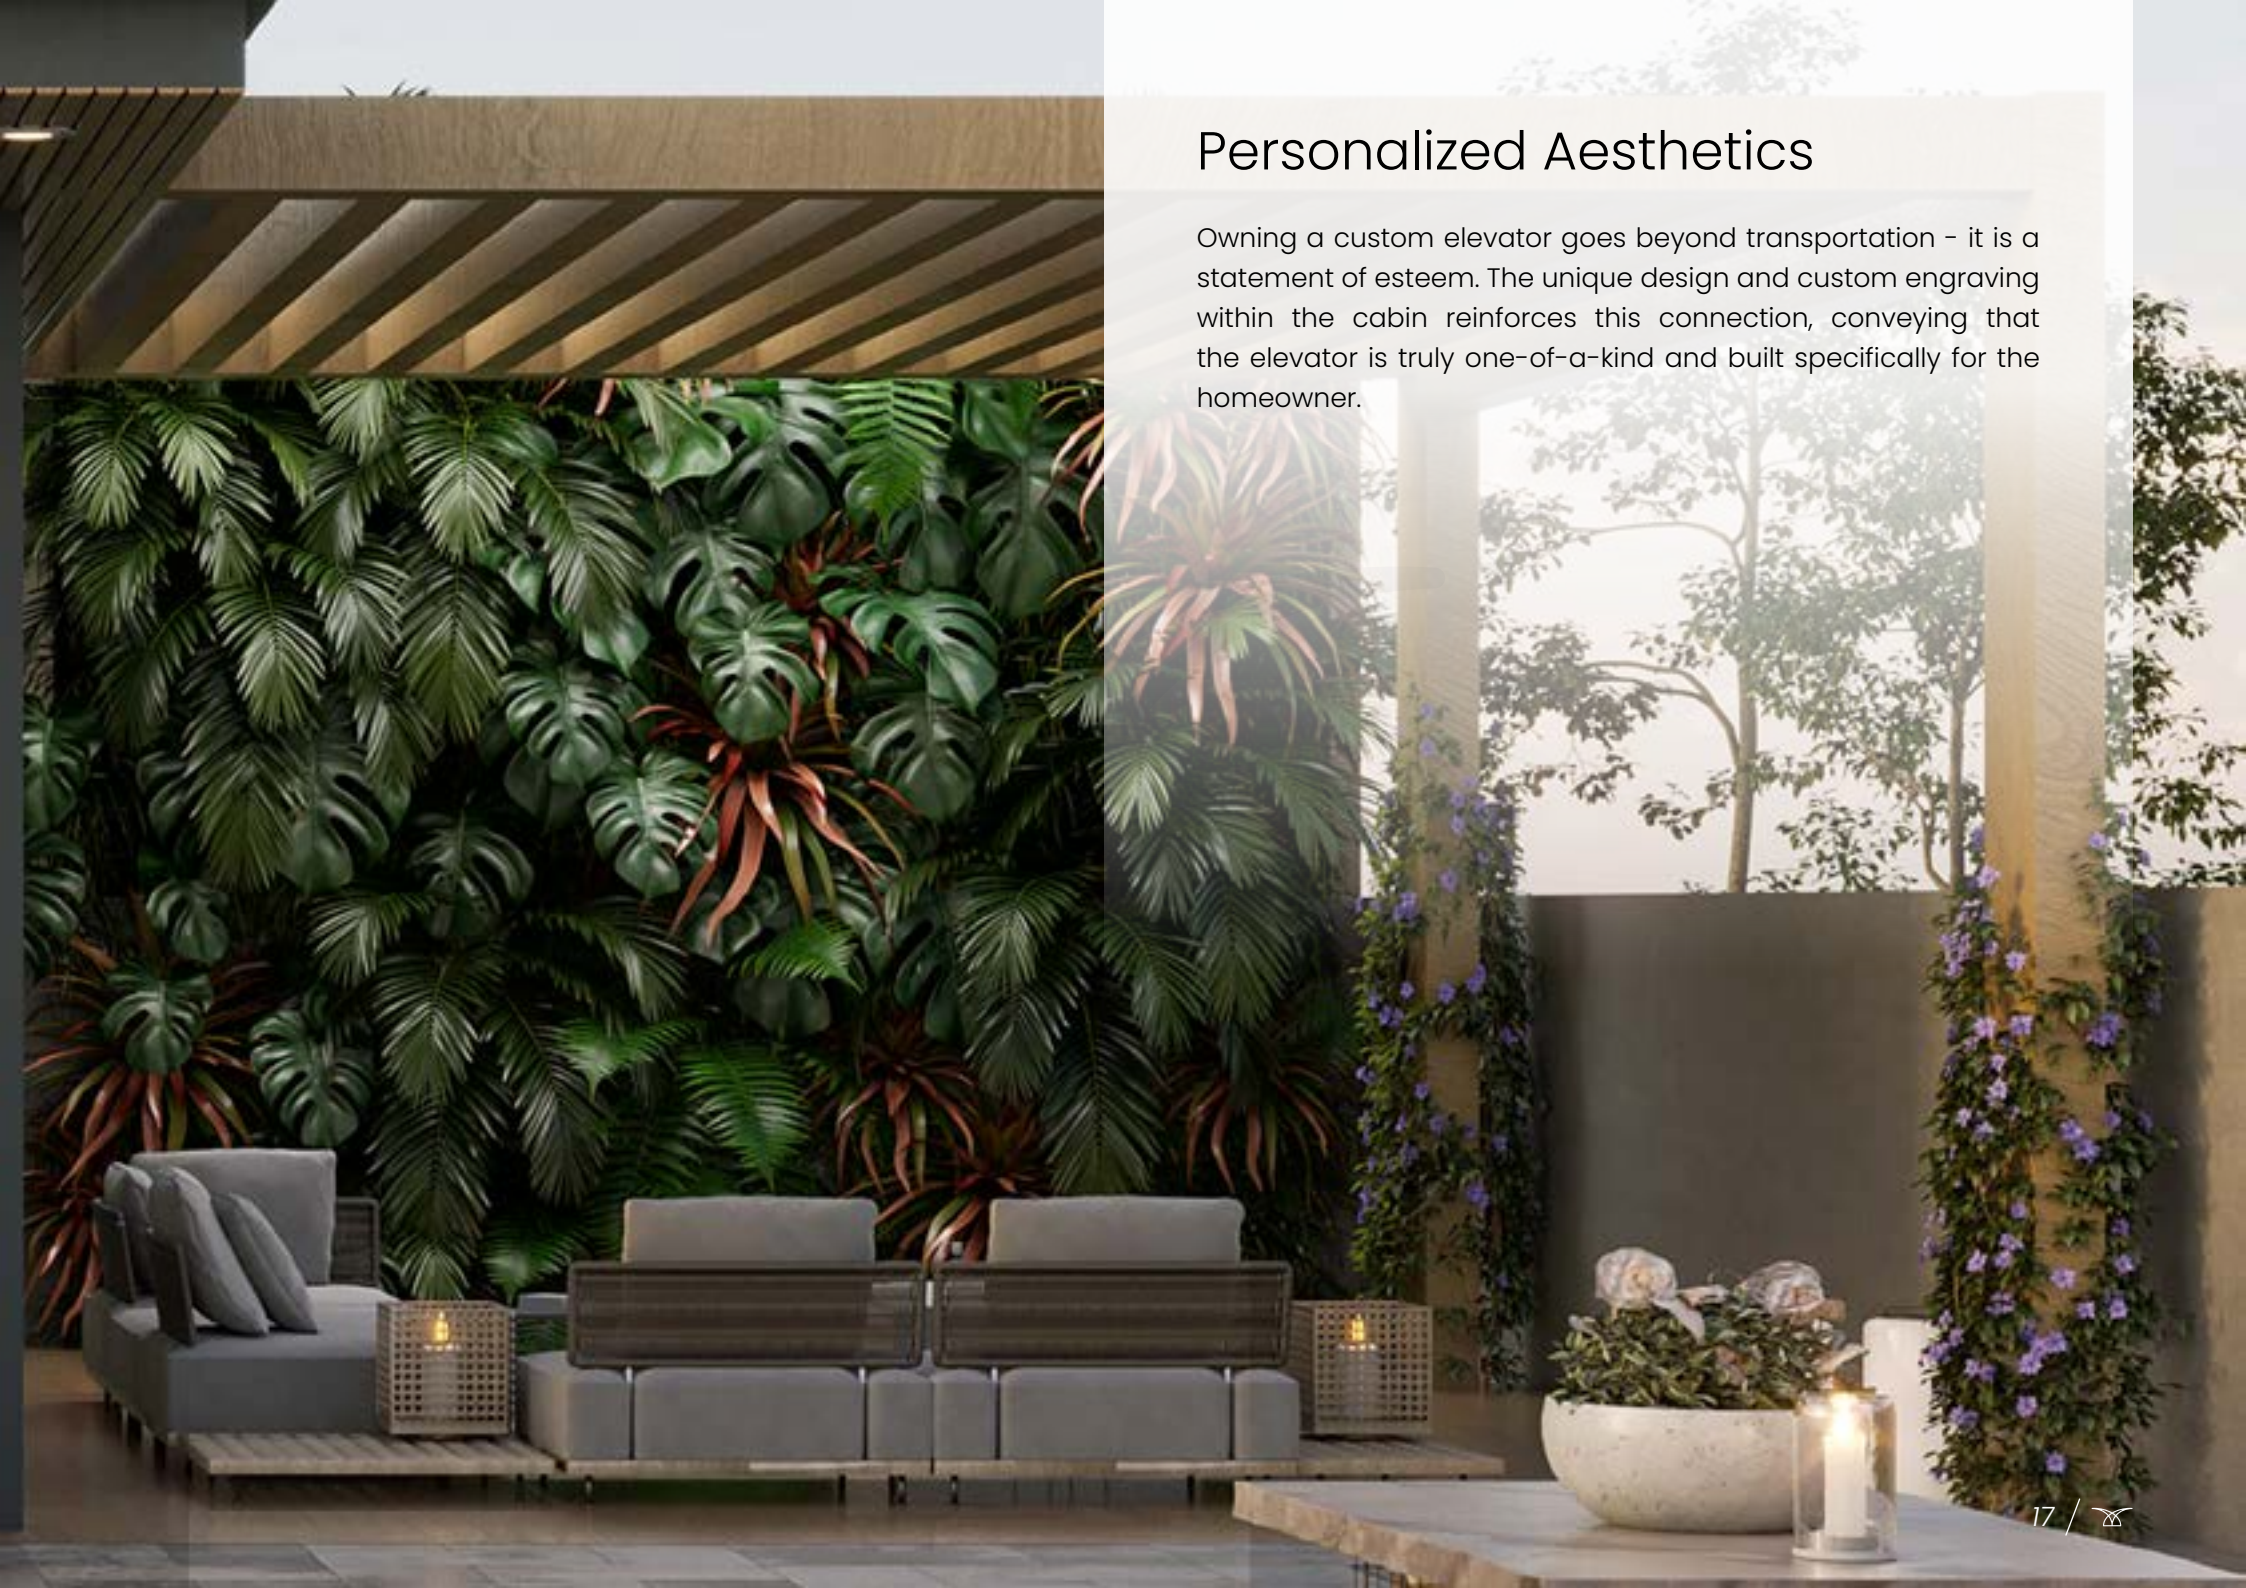

The transparency of the elevators allows for a clear view of one's home, providing a sense of security and connectivity to those within the dwelling. Furthermore, this element imbues the elevators with a visual appeal, ensuring a truly exceptional experience.

nibav

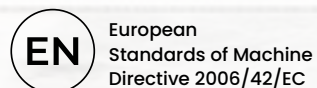

Personalized Aesthetics

Owning a custom elevator goes beyond transportation - it is a statement of esteem. The unique design and custom engraving within the cabin reinforces this connection, conveying that the elevator is truly one-of-a-kind and built specifically for the homeowner.

Pioneering Safety Mechanisms

NIBAV has developed an elevator specifically designed for private residences, taking into consideration the safety of children and elders who may use it. With safety as our paramount concern, we have implemented four layers of safety measures that exceed standard requirements. Our aim is to provide our customers with an elevator that is absolutely safe in all aspects, giving them peace of mind and ensuring the safety of their loved ones. With our commitment to safety, you can trust that our elevator is the right choice for your home.

4

LAYERS OF SAFETY

DID YOU KNOW THAT OUR ELEVATOR'S TECHNOLOGY IS THE SAFEST ON THE PLANET?

1. In case of a power outage during the operation of the elevator, the elevator's car automatically descends to the ground floor. The passenger can open the door manually and step out without any technical assistance.
2. In any unfortunate event of the elevator getting stuck between two floors, the 'Emergency Landing Button' placed inside & outside the elevator's cabin enables the user to land the elevator on the ground floor.
3. In case of Pneumatic pressure failure or if the lift travels beyond the designated speed, the 'Sure Stop' safety feature locks the elevator's car within 2 inches.
4. The Conventional Lock on the door can be used to manually unlock the elevator, in case of an emergency.

Adaptability

Our elevators require 3.3 feet of diametrical space, out of which, the cabin occupies 3 feet of diametrical space. The sleek, compact design and technological simplicity ensures that our elevator makes maximum utilization of your home space. The elevator can be installed without any requirement for pit/headroom installation, flooring reinforcements / structural changes.

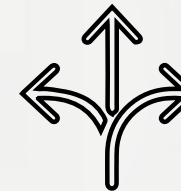

Easy and Mobile

With its unique ability to be 'Completely knocked down' and moved from one location to another, NIBAV lifts are perfect for you to plan a change of home layouts, locations or even add additional stops to your existing lifts. Our lifts are designed to grow with you and your family and are easy to install, operate, and maintain, making it a convenient and hassle-free addition to your home.

Return to Home

Our lift is equipped with a unique feature that allows it to descend to a specific floor when not in use, rather than remaining stationary on a random floor. This means that you can program the lift to wait for you on the ground floor when you enter your home.

Flexibility

With our patented technology, a G+1 elevator can be converted into a G+2 or a G+3 at any given point in time. The elevator can also be completely dismantled and reinstalled in case of relocation.

WHAT'S NEW IN SERIES III

- AESTHETICS
- SAFETY
- PERFORMANCE

AESTHETICS

We believe a cohesive aesthetic can create a sense of harmony and balance throughout the house, while unique and eye-catching elements can add interest and spark joy. Ultimately, aesthetics are a reflection of one's personal style and taste, and when thoughtfully curated, can transform a house into a warm and welcoming home.

SAFETY

Safety has always been a top priority at NIBAV which goes to talk about our sophisticated designs of four levels of safety features such as emergency button, automatic descent, alarms, etc. Manufactured in accordance with European Standards, our elevators are CE certified and have a ISO 9001:2015 certification from TÜV, that ensures that a product, service, or process has passed all safety testing and meets relevant compliance requirements.

MULTIPLE DOOR ACCESS

The door access can be customized to be on different sides of the elevator for different floors. This flexibility of the elevator comes in very handy, especially for homes that have been planned and built without elevator space. This technology removes a lot of complications faced by every home elevator buyer.

HERE'S WHAT THEY HAVE TO SAY

"As a chef, I was finding it hard to have regular access to my workspace at the basement, but the NIBAV elevator's compact design made it the perfect solution. It not only looks sleek and stylish, but it also provides convenient access to my kitchen on the lowest level of my house"

Chef John Cristopher, Malaysia

"I am so grateful for my NIBAV elevator. It allows me to maintain my independence and move around my home with ease. Thank you, NIBAV!"

George Modest, Australia

"Climbing stairs has always a great form of exercise but owing to my knee injuries, I wasn't able to take the stairs as often and also found it difficult to access my home gym. NIBAV lifts has eliminated the problem entirely as I don't add any additional stress to my knees"

Rashid, UAE

"NIBAV Lifts has been a big boon for me and my wife as we were finding it difficult to move around the house. It has been a huge relief to use an elevator that offers these many safety features as the NIBAV Lift"

Frank, Australia

"I always adhered to the principles of Vastu. I never thought I could have an elevator in my home without digging a pit, but NIBAV made it possible. They have installed it without any disruptions to my home's Vastu. Thank you, NIBAV"

Manish Tiwari, India

"As a parent, I am grateful to NIBAV Home Lifts for their commitment to safety, which is evident in the EN, CE, and TÜV certifications. Their dedication to safety gives me confidence in the products I purchase for my home"

Deion Kentay, Nigeria
